

1 | Waste Batteries Collection Scheme

1.1 | Industrial Batteries

As a producer of industrial batteries under the Waste Batteries and Accumulators Regulations 2009, we at Landis + Gyr – UK produce meters that contain Lithium - coin, Lithium - Ion and Lithium thionyl chloride type industrial batteries which are placed or intended to be placed on the market during this year and the preceding three years. We are obliged to take back free of charge, waste industrial batteries supplied to an end user for treatment and recycling.

We are required to do this in any calendar year where we place new industrial batteries on the market. If any of our customers or in certain cases other end users, require us to take back Industrial batteries, they should contact the **UK Sales Team on GBPBSal@landisgyr.com** to make arrangements.

If necessary, you can also contact us at **Landis + Gyr Ltd, 1 Lysander drive, Northfields Industrial estate, Market Deeping, Peterborough PE6 8FB, UK - Tel: 01778349700.**

We will agree the necessary arrangements for the return, proper treatment and recycling of the waste industrial batteries.
